RULING ON ENTITLEMENT¹

On October 24, 2022, Therese Jackson filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*² (the “Vaccine Act”). Petitioner alleges that she suffered a shoulder injury related to vaccine administration (SIRVA) following administration of the influenza (flu) vaccine on September 29, 2020. Petition at 1. Petitioner further alleges that the vaccine was administered within the United States, her injuries lasted for longer than six months, and she has not filed a civil action or received compensation in the form of an award or settlement for her vaccine-related injuries. Petition at 1, 8. The case was assigned to the Special Processing Unit of the Office of Special Masters.

On October 20, 2023, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent's Rule 4(c) Report at 1. Respondent concluded that "[P]etitioner's alleged injury is consistent with SIRVA as defined by the Vaccine Injury Table." *Id.* at 5. Specifically, Respondent determined that "[P]etitioner had no history of pain, inflammation, or dysfunction of her left shoulder prior to vaccination; pain occurred within 48 hours after receipt of an intramuscular vaccination; pain was limited to the shoulder in which the vaccine was administered; and no other condition or abnormality has been identified to explain petitioner's shoulder pain." *Id.* Respondent further agrees that Petitioner suffered the residual effects of her condition for more than six months. *Id.*

In view of Respondent's position and the evidence of record, I find that Petitioner is entitled to compensation.

IT IS SO ORDERED.
